## It's all in the Chemistry

Sicomin is a leading formulator and manufacturer of advanced epoxy systems with over 30 years of experience in the production of highly specialised, custom made epoxies and off the shelf solutions.

The Sicomin product range comprises of **Clear, Foaming, Fire Retardant and Bio-based** formulations that are suitable for a variety of processing techniques including Infusion, RTM, Pultrusion, Tooling, Hand lay-up and on-site Prepreg manufacturing. Sicomin also distributes a vast range of high performance structural core materials, fabric reinforcements (carbon and glass), fillers and consumables.

Founded in 1946, Sicomin has grown consistently and today our epoxy solutions are used extensively in the following market areas. As true innovators and trusted suppliers, we are proud to have been involved in some of the most high-profile global composite projects of the last 20 years.

- Marine & Defence
- Winter and Water Sports
- Civil Engineering & Construction
- Automotive & Rail
- Aerospace
- Renewable Energy

## Leaders in the race towards a Sustainable Future...

Sicomin invests heavily in the innovation and development of environmentally enhanced bio based epoxy systems, derived from natural origins. As a result, we are one of the leading suppliers today.

Our Greenpoxy® range that includes products for infusion, injection and tooling, all available in industrial quantities, contains bio-based carbon contents ranging from 28%- 51% - the highest on the market and tested in accordance with ASTM D6866. Our future goal is to one day create a 100% bio-based system using bio-based hardeners.

## Engineering Expertise

Sicomin offers a dedicated engineering service, ensuring customers receive a finely tuned composites package optimised to their specific requirements. This enhanced offering is available on a global scale and allows the delivery of a complete portfolio of superior epoxy systems coupled with bespoke engineering guidance.

## A Global Reach

Sicomin's 7000m<sup>2</sup> HQ and production facility is strategically located close to Marseille, a significant transport hub in Southern France with an international port and excellent airport links. Our satellite office is situated in Brittany, western France, serving our domestic customers.

A global company, our extensive distribution network also ensures our products are delivered rapidly all over the world as far as Asia, the Middle East, South Africa, USA and across Europe.

### Buy Sicomin Online

Our ecommerce shop is available at [www.boutique-resine-epoxy.fr](http://www.boutique-resine-epoxy.fr) for delivery within France. Global delivery will be available very soon.
